ECO BRICK COLLECTION

AGORA

LOHASAU.COM

Eco-brick is the perfect choice for environmentally aware builders

Eco-brick offers all the benefits and features of traditional ceramic facing bricks, but in a slimmer format: An Eco-brick is 45 mm narrower, without compromising durability, strength or stability. The slimline size means 30% more can be fired on a kiln car at any one time. On a like-for-like brick this dematerialisation (doing more with less) results in reducing our overall CO₂ impact.

The architectural power of sobriety

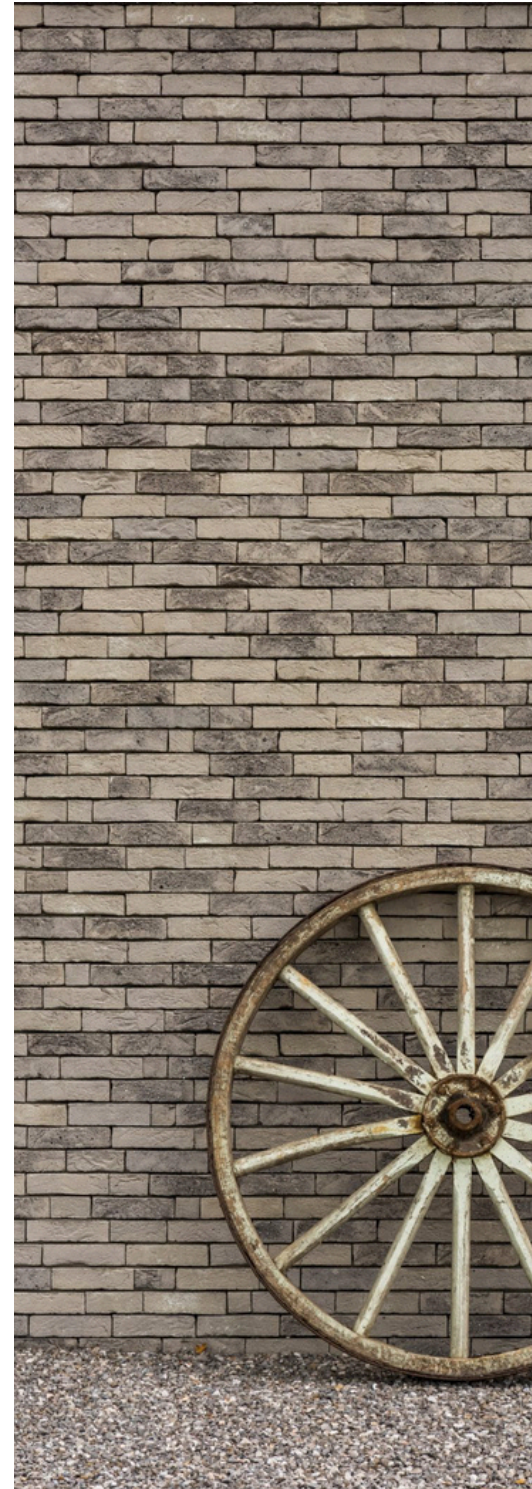

Agora facing brick stands as the sensible choice, embodying enduring simplicity and value. Its timeless hand-moulded design has proven its worth over the years. A silent yet powerful force, it subtly accentuates the architectural design of your building. The matte finish not only absorbs less water but also makes it less susceptible to dirt, ensuring easy maintenance and long-lasting elegance.

Pure clay for white and gray stones

Choose from 7 white and grey tones. Bricks like Agate Grey, Silver Grey and Nevel White have undergone the braising oven process. Combine these colour shades to create a modern facade with a timeless appearance.

Multi-purpose

The Agora bricks are versatile, suitable for traditional bricklaying, thin bricklaying, and bonding methods. The Agora range offers 4 formats, including Eco brick, which is up to 45 mm slimmer than the average facing brick, providing increased insulation and living space along the entire perimeter of the house. Additionally, Agora bricks are available as brick slips, offering further flexibility in design options.
